EDUCATION

Guru Gobind Singh Indraprastha University

B.Tech in AI & Data Science

CGPA: 8.82

Delhi

2022 – 2026

P.B.P.S.S School

Class XII

81.6%

Saharsa

2020

PCS Sakarpura

Class X

75.6%

Saharsa

2018

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, SQL

Machine Learning: Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib

Tools: Git, GitHub, Power BI

Core Subjects: DBMS, OOPS, Computer Networks, Operating Systems, Cloud Computing

EXPERIENCE

Development Intern

Wetala Technologies Pvt. Ltd. (Remote)

Sep 2025 – Apr 2026

- Developed and deployed a multi-tenant full-stack platform using React.js, Node.js, Express.js, and MongoDB to support multiple clients on a scalable system.
- Designed responsive frontend interfaces and backend services ensuring seamless integration and optimized performance.
- Built RESTful APIs and managed database operations for secure and efficient client-specific data handling.
- Implemented authentication and role-based access control mechanisms for secure user management.
- Collaborated with clients to gather requirements, deliver features, and resolve technical issues.
- Followed Agile development methodologies throughout development, testing, and deployment phases.

PROJECTS

Detecting Climate Signals | Python, TensorFlow, NumPy, Matplotlib

- Built an Artificial Neural Network (ANN) to predict temporal climate patterns from spatial temperature data.
- Applied Layer-wise Relevance Propagation (LRP) to interpret model predictions and generate relevance heatmaps.
- Trained the model on CESM large ensemble climate datasets to analyze impacts of greenhouse gases and aerosols.
- Achieved strong correlation between predicted and actual climate timelines while improving model interpretability.

Phishing Website Detection | Python, Scikit-learn, Pandas, NumPy

- Developed a machine learning-based system to detect phishing websites using URL and security-related features.
- Performed data preprocessing and feature engineering using Pandas and NumPy for effective model training.
- Implemented and compared classification algorithms including Logistic Regression, SVM, Decision Tree, and Random Forest.
- Evaluated model performance using accuracy scores and other performance metrics to identify the best-performing model.

- Developed a full-stack music streaming platform with separate admin and client interfaces.
- Implemented authentication features including secure login and password management.
- Built RESTful APIs for managing songs, labels, and user-related data.
- Integrated Cloudinary for efficient cloud-based media storage and retrieval.

ACHIEVEMENTS

- Solved 200+ DSA problems across LeetCode and GeeksforGeeks.
- Built multiple full-stack and machine learning projects using modern technologies.
- Maintained a CGPA of 8.82 in B.Tech AI & Data Science.

CERTIFICATIONS

- | | |
|---|---|
| • IBM SkillsBuild Summer Internship – Data Analytics |  |
| • IBM SkillsBuild Project Based Learning – Front End Web Development |  |
| • 1M1B Green Skills Internship (AICTE & Salesforce) |  |
| • MATLAB for Machine Learning |  |

POSITION OF RESPONSIBILITY

- Web Development Team Member, SDC Tech Club
- Media Team Member, Tradophile – Finance & Investment Society
- Education Volunteer, Robin Hood Academy
