EDUCATION

Guru Gobind Singh Indraprastha University B.Tech AI & Data Science CGPA: 8.76	Delhi 2022 - 2026
P.B.P.S.S School Class XII 81.6%	Saharsa 2020
PCS Sakarpura Class X 75.6%	Saharsa 2018

SKILLS

Languages:	C, C++, Python, JavaScript
Frontend:	React.js, HTML, CSS, Tailwind CSS
Backend:	Node.js, Express.js
Database:	MongoDB, SQL
Core Concepts:	OOPS, DBMS, Computer Networks, Cloud Computing
Tools:	Git, GitHub, Power BI
Machine Learning:	Machine Learning
Interpersonal Skills:	Problem-solving, Adaptability, Communication, Leadership, Teamwork

EXPERIENCE

Development Intern Wetala Technologies Pvt. Ltd. (Remote)	Sep 2025 – April 2026
- Developed a multi-tenant full-stack platform using React.js, Node.js, Express.js, and MongoDB to support multiple clients on a single system. - Designed and implemented frontend interfaces and backend services, ensuring seamless integration and performance. - Built RESTful APIs and handled database operations for efficient client-specific data management. - Implemented authentication and access control mechanisms to securely manage user roles and permissions. - Collaborated directly with clients to gather requirements, deliver features, and resolve issues. - Followed Agile development practices, contributing to development, testing, and deployment of production-ready features.	

PROJECTS

Sinosis Digital | React, Node.js, MongoDB, Cloudinary

- Developed a full-stack music streaming platform with admin and client interfaces.
- Implemented authentication features including secure login and password management.
- Built RESTful APIs for managing songs, labels, and user data.
- Integrated Cloudinary for efficient media storage and retrieval.

E-Shop E-commerce Website | React, Tailwind CSS

- Developed a responsive e-commerce platform with product listing, cart, and checkout functionality.
- Designed modern UI using Tailwind CSS ensuring mobile-first responsiveness.
- Improved user experience through optimized frontend performance and navigation.

Detecting Climate Signals

- Built an Artificial Neural Network (ANN) to predict temporal climate patterns from spatial temperature data.
- Applied Layer-wise Relevance Propagation (LRP) to interpret model predictions and generate relevance heatmaps.

- Trained model on CESM large ensemble climate datasets to analyze effects of greenhouse gases and aerosols.
- Achieved strong correlation between predicted and actual climate timelines while improving interpretability.

POSITION OF RESPONSIBILITY

- **Web Development Team Member, SDC Tech Club**
- **Media Team Member, Tradophile – Finance & Investment Society**
- **Education Volunteer, Robin Hood Academy**

CERTIFICATIONS

- **IBM SkillsBuild Summer Internship – Data Analytics** [↗](#)
- **IBM SkillsBuild Project Based Learning – Front End Web Development** [↗](#)
- **1M1B Green Skills Internship (AICTE & Salesforce)** [↗](#)
- **MATLAB for Machine Learning** [↗](#)
